

Dr. Daniel F. Murphy Medical Mission Work

MEDICAL MISSION WORK

Dr. Murphy continues to be involved in medical and surgical mission trips to underserved people in third world countries since 1989. Initially working with Operation Smile and more recently Operation Walk, he has made more than a dozen trips and had the privilege to care for and operate on hundreds of people.

Recent work with Operation Walk has allowed Dr. Murphy to work with Orthopedic Faculty from UNC Chapel Hill, including long time friend Dr. Lawrence Dahners. He and Dr. Murphy went on their first mission trip to Panama in 1989. Operation Walk has also provided the opportunity for Dr. Murphy to continue teaching Orthopedic Residents in and out of the Operating Room.

Our orthopedic practice remains very involved with continued fund raising support for Operation Smile.

The next mission is planned for Jinotega, Nicaragua in August 2007, when Dr. Murphy will be accompanied by his son, Timothy, who will graduate from medical school at UNC in 2008.

More to follow in the future...
